

Number Spinners

Printable spinners for maths games and activities

What's in this set?

This pack contains a full set of printable spinners to use in place of dice for maths games and activities at home. Each spinner is a regular polygon — simply cut out, push a split pin or cocktail stick through the centre mark, and spin to play!

■ Numbers 1–6	6 segments — a fun alternative to a standard dice
■ Numbers 1–10	10 segments — great for extending number work
■ Operations	8 segments — + – × ÷ for calculation games
■ Times Tables 2–12	One spinner per times table, 11 spinners in total

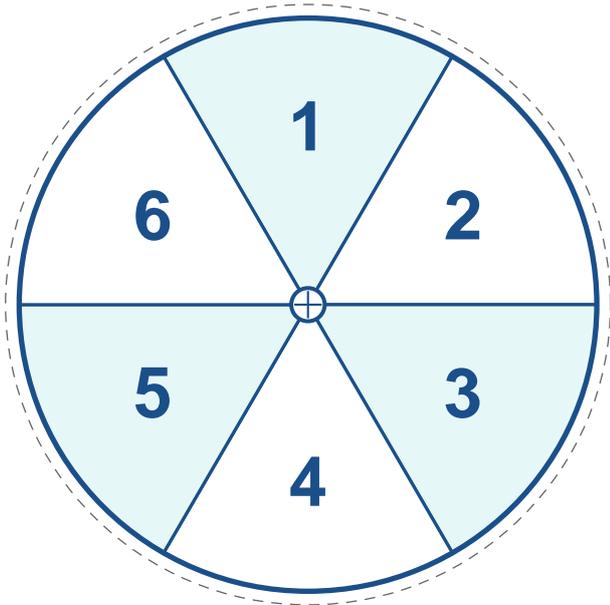

■ How to assemble:

- Print this page onto plain paper or thin card.
- Cut carefully around the dashed circle.
- Use a sharp pencil point or split pin to make a small hole at the centre mark.
- Push a split pin through the hole and open the legs on the back — or push a cocktail stick through and secure with a small ball of blu-tack underneath.
- Laminating before cutting makes the spinners much more durable for repeated use.
- Store each spinner in a small labelled envelope or zip bag.

Number Spinners

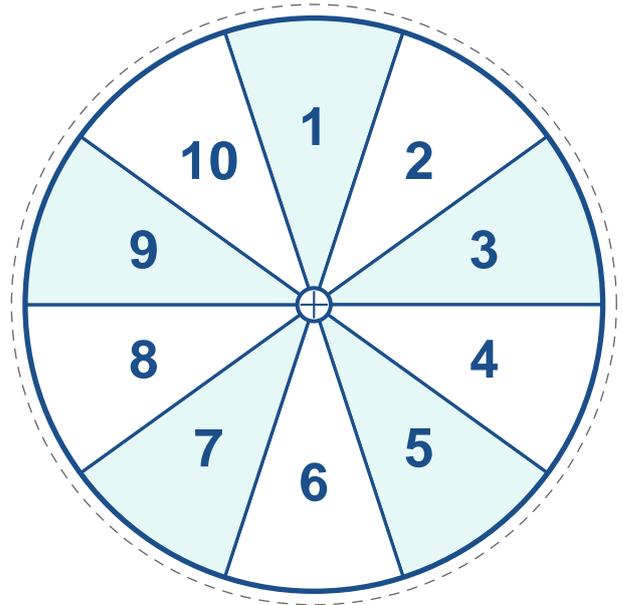

Numbers 1–6 and Numbers 1–10

Numbers 1–6

Cut out, push a split pin or cocktail stick through the centre

Numbers 1–10

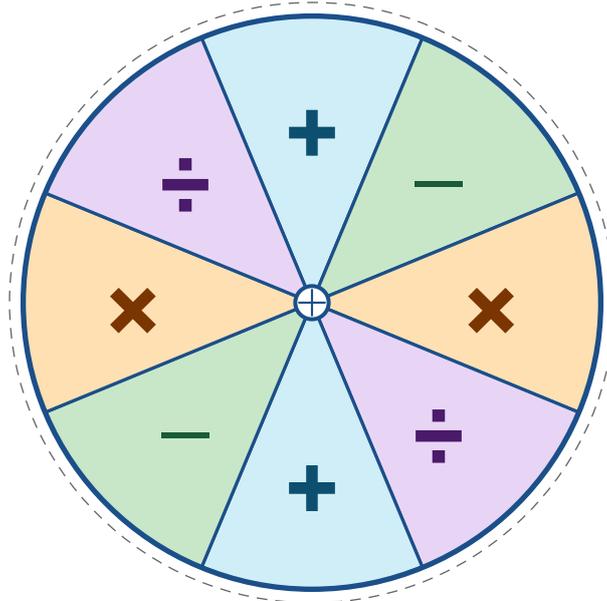

Cut out, push a split pin or cocktail stick through the centre

Operations Spinner

Addition · Subtraction · Multiplication · Division
